AVIATION MANAGEMENT CERTIFICATE PROGRAMS

The undergraduate aviation certificate programs offered by the Burton D. Morgan School of Aeronautics prepare students for ground and flight examinations for various FAA flight licenses and ratings. The flight certificate programs are delivered in accordance with CFR Part 141 under Lynn University's CFR Part 141 certificate. The simulator certificate programs are offered in accordance with CFR Part 142 under Lynn University's CFR Part 142 certificate. All flight courses and the ATP certificate program culminate with a ground oral examination and a check ride with a FAA Designated Pilot Examiner. Successfully completing the ground examination and the check ride will result in the FAA issuing the appropriate license or rating.
