

There is an urgent need for educated professionals working to lessen humans' impact on the planet and to ensure we manage our activities on Earth in responsible and sustainable ways.

About Lynn

Lynn University is one of the most innovative, international and individualized small universities in America. We are a young and forward-thinking organization located alongside South Florida's booming business centers and beautiful beaches, and we are focused on one thing: **preparing students for success.**

Our professors concentrate on the art of teaching—making good students great and great students remarkable.

Our award-winning, tablet-based learning initiative puts a transformational learning companion into the hands of students.

And our graduates? They've gained the intellectual flexibility and global experience to take the lead in an ever-changing world.

UNIVERSITY

Protect the planet

Learn about the relationship between humans and the natural world.

COLLEGE OF ARTS AND SCIENCES

Environmental Studies (B.S.)

Be a part of the solution

Our species has lived on Earth for more than 200 million years. For most of that time, we have lived sustainably within our ecosystems. However, as our numbers have grown, this sustainability has decreased.

Through pollution, land overuse, unsustainable hunting and fishing practices and resource consumption, our species has left an indelible mark on our global ecosystem. This affects the land, atmosphere and every living system, including ourselves.

As an environmental studies major, you'll work and study with a primatologist and a principal investigator for alternate energy and take a hands-on approach to studying human-environmental interaction and wildlife conservation (including direct observation of wild chimpanzees).

You'll become an active participant in environmentally-themed initiatives, locally and abroad, and develop your own solutions to current problems.

Earth's protectors

As a graduate of environmental studies, you can pursue a range of careers such as:

- field researcher
- environmental educator, engineer, consultant, researcher, scientist, lawyer, regulator
- naturalist
- museum curator
- parks ranger
- environmental lobbyist
- animal behavioral ecologist
- conservation biologist
- animal welfare lobbyist

Natural Successes

Our alumni are doing incredible things for the Earth and its denizens. Here's a sampling of where they have conducted research, led initiatives and worked with other educational institutions:

- Lion Country Safari
- Washington Institute
- Tonkolili Chimpanzee Project Field Site in Sierra Leone

Explore the possibilities

Give Andrew R. Halloran, assistant professor, a call. He's happy to answer any questions about this important major.

Contact him at ahalloran@lynn.edu or 561-347-7149. (Ask him about his book on Chimpanzee communication, *Song of the Ape*.)

Or reach out to our Office of Admission at:
